

PRODUCTS FOR CABLE LAYING

Pipe Equipment Specialist offer a wide range of products specially designed for the Cable Laying industry:

◀ EXPANDING STOPPER

Expanding Stoppers are used for pipes and ducts in the size range from 1/2" (12mm) to 48" (1200mm). They are manufactured from nylon, aluminium or pressed steel (dependant on size) and are designed to prevent the ingress of water and dirt into new and existing pipes.

ROPE BLOWING TEE ▶

Pipe Equipment's Rope Blowing Tee is a product designed for installing draw ropes into cable ducts. The Rope Blowing Tee is connected to the inlet of a Pipe Stopper (supplied separately), and then connected to the airline from a pneumatic compressor.

◀ HIGH PRESSURE ROPE BLOWING TEE

Similar to the Rope Blowing Tee, this product is designed to withstand pressure up to 10 bar without additional bracing. It incorporates a pressure relief valve to prevent over-pressurisation.

FOAM PIGS c/w Rope ▶

Our range of Foam Pigs c/w Rope have been specially designed to make the installation of draw ropes and tapes into cable ducts and pipes much simpler and quicker. Once installed, the draw rope, or tape, can be used to pull in a cable or winch wire.

◀ STEEL BELLMOUTH & INSERTION TRUMPETS

Steel Bellmouths are designed to guide a cable into a duct without damage to the cable or the duct. They are made in separable hinged halves.

Insertion Trumpets have been specially developed to eliminate the possibility of damage to PE pipes caused by the cut edge of the existing metal pipe during a dead insertion or slip lining operation.

The company follows a policy of continuous product development and as such reserves the right to make alterations to equipment and techniques without prior notice.

PRODUCTS FOR CABLE LAYING

CABLE ROLLERS ▶ Our range of Cable Rollers are designed to help with the installation of Cables. We offer a wide range of design and sizes.

◀ PROVING PIGS

The Pipe Equipment Specialists Proving Pig is used to prove that the internal dimensions of a pipe do not fall below a minimum diameter.

They are supplied with a towing eye at both ends so that a rope may be pulled in at the same time to allow the pig to be retracted if necessary, or to act as a cable draw cord.

DUCT BRUSH ▶

Duct Brushes are used to remove dirt and other loose debris from inside electrical or communication ducts. They are supplied with an eye at both ends for pulling through ducts. Duct brushes are available in sizes 2" to 16".

◀ CONTINUOUS FIBREGLASS RODS

Also known as Cobras or Duct Rods, this product is used in pipe and duct laying operations to assist with the installation of draw ropes, cables and winch wires. They can also be used as part of a CCTV or pipe cleaning system.

TOWING SOCKS ▶

Also known as Chinese Fingers, Pulling Stockings and Cable Grips can be used for any application that requires a pulling load to be applied to a cable, pipe, tube or similar object. These can be used either above or below ground, their most common use being for the installation of cables. They work on the principle 'the harder the pull, the tighter the grip'.

The company follow a policy of continuous product development and as such reserves the right to make alterations to equipment and techniques without prior notice.
