

# NOSE CONES

The Pipe Equipment range of quick fit service Nose Cones has been specially developed to provide a cone shape on to the leading end of a new PE pipe which is to be inserted into an existing pipe or duct. They also prevent pipe end damage and internal contamination of the PE pipe during insertion.

This fully reusable product avoids the need to use fusion fittings or cutting the pipe end to shape, saving time and jointing operations.

Nose Cones are manufactured from moulded plastic and are available in service sizes 16mm, 20mm, 25mm and 32mm.

## MODE OF OPERATION

The Nose Cone is simply knocked into the end of the pipe.

## MAJOR FEATURES

- Provide a leading end
- Simple and quick to fit and remove
- Robust construction
- Fully reusable
- Effective protection from pipe end damage and internal contamination

The company follow a policy of continuous product development and as such reserves the right to make alterations to equipment and techniques without prior notice.
