

PIPE END CAPS

Pipe End Caps are a quick, simple, cost effective and reliable product used to provide temporary water and dirt seal at the end of a plastic or metallic pipe.

They are particularly useful for temporarily capping off road crossings that have been laid by Directional Drilling or Direct Burial prior to the main pipeline.

Caps are available to suit virtually all sizes of plastic or metallic pipe from 16mm up to 1600mm.

The company follow a policy of continuous product development and as such reserves the right to make alterations to equipment and techniques without prior notice.
