

VALVE KEYS

Pipe Equipment offer a comprehensive range of Valve Operating Keys for all valve spindle shapes and sizes. These keys are available individually, or as a Universal Valve Key Set - for users likely to encounter several different spindle sizes at various depths. The latest addition to the range is a Valve Key suitable for use with the Wavin 32mm and 63mm PE valves.

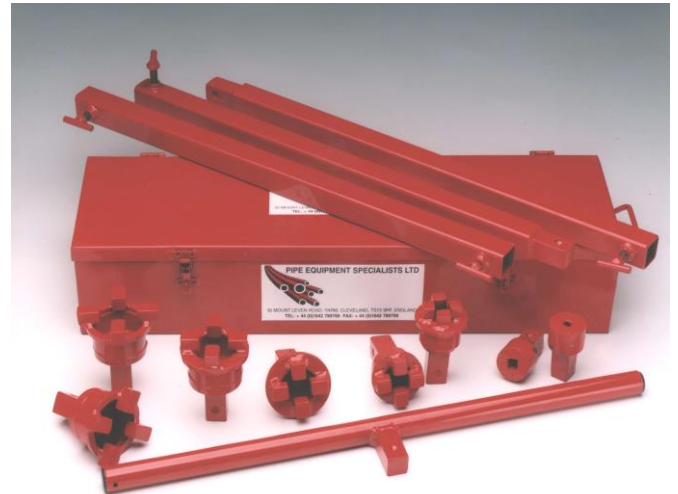

UNIVERSAL VALVE KEY SETS

This set consisting of up to eight adapters that will fit all square headed valve spindles from 11mm to 50mm, a 'Tee' bar handle and three extensions each 0.8 metres long enables actuation of valves up to 2.3 metres deep. The components are all powder coated for long life and are supplied in either sturdy carry bags or a metal box.

MODE OF OPERATION

The size and depth of the valve spindle to be actuated is ascertained and the correct spindle adaptor and number of extensions selected.

The spindle adapter and 'Tee' bar are simply connected together with the extensions and secured with thumbscrews. They are passed through the valve box opening and located onto the valve spindle. The valve can then be operated.

WAVIN PLASTIC VALVE KEY

Specifically designed for the operation of Wavin plastic valves both 32mm and 63mm sizes, the Plastic Valve Key features a 450mm 'Tee' handle and can reach valves up to 1000mm deep. The key is of a heavy duty gauge welded tube construction and powder coated to ensure long life.

MAJOR FEATURES

- Robust fully welded mild steel construction
- Powder coated for long life
- Simple operation
- Available as a set or individually
- Special sizes manufactured to suit customer requirements

Pipe Equipment Specialists Ltd. also manufacture a product known as the Gas-Vac™ for the no-dig clearing of filled or flooded valve pits and chambers.

The company follow a policy of continuous product development and as such reserves the right to make alterations to equipment and techniques without prior notice.
